

Cloud Object Storage (COS)

Unlimited Data, Always Available and Endlessly Affordable

The Enterprise Threat

Data backups are becoming increasingly difficult for businesses across industries due to exponential data expansion. Organically grown environments, insufficient on-premises storage capacity, inefficiencies of traditional backup solutions, and the danger of severe data loss events compound these difficulties. Issues occur when businesses are entrusted with managing and maintaining existing backup infrastructure as well as older storage devices and technologies. Delayed data restorations can cause a significant negative impact to business continuity. As a result, every firm's data management and business continuity strategy require a safe, accessible, and scalable cloud backup storage option.

The Enterprise Solution

Xigent's Cloud Object Storage (COS) offers a simple, trusted, and efficient cloud storage solution. Our COS solution offers simple pricing that allows limitless scalability without breaking the bank, including zero cost for API calls and egress fees. Users only pay for the storage they require for as long as they require it. Xigent's COS solution is fully S3 compliant and designed to be used by the most common backup programs, Kubernetes or any S3-aware application.

All data stored within Xigent's COS is fully encrypted at rest and in flight. Multi-regional availability ensures that your data is always on and available without costly delays. COS is a fantastic option for data backups, data restoration, and disaster recovery due to cloud-based air gapping, ransomware protection, and object immutability.

COS Benefits

Predictable Costs

- ▶ No egress or ingress fees
- ▶ No hidden API fees

Resilient

- ▶ Experience 11 nines data durability
- ▶ Active integrity checking to ensure object availability

Data Security

- ▶ Ransomware protection
- ▶ Air gap compliant – for offsite and immutable storage needs
 - ▶ S3 object lock at bucket or object levels
 - ▶ Governance or compliance mode to meet your security needs
- ▶ SOC 2 and ISO 27001 certified datacenters
- ▶ Encryption at rest
- ▶ HTTPS secure upload/download

Scale to Your Needs

- ▶ Unlimited capacity range in increments of 1 TB
- ▶ Scale to 1,000 buckets

High-Performance

- ▶ Average time-to-first-byte (TTFB) under 15 ms
- ▶ Always on, hot-tier cloud storage
- ▶ No waiting for rehydration of data

Industry Compliance

- ▶ HIPAA compliant
- ▶ CJIS compliant
- ▶ FERPA compliant
- ▶ GDPR compliant
- ▶ MPA compliant

No Up-Front Capital Investments or Hidden Costs

Xigent's Cloud Object Storage as a service provides a simple, trusted, and efficient on-demand scale-out storage solutions for a multitude of storage needs with a fully S3-compatible interface. It is supported by almost all modern backup and storage management systems and appliances. Complement your existing backup infrastructure without any up-front capital investments for storage systems and without hidden costs for maintenance, technology upgrades, and service. With zero API charges or unknown egress fees, you pay only for the storage you consume – nothing more!

Interested in Cloud Object Storage from Xigent but in need of additional support for data migration or to simply get advice? Engage with our team of migration architects and you can eliminate the need for obsolete storage technology today. Our storage experts can help you transform your IT to a hybrid and multi-cloud architecture using Xigent Cloud Object Storage as a service.
